

How to read the corpus

One enclosure. Two faces. Ten papers and the note that binds them. Start at the spine.

David P. Reichwein · Asymmetric Intelligence & Innovation · Nashville, Tennessee · ai2papers.com

SPINE · READ FIRST

One Skin, Two Faces

Technical note, 30 September 2026. Names the object the papers already built: SI as Λ sealed inside Π , ChronaGate™ as the same cut on ingress and egress. After this page, the rest of the corpus is a system, not a catalog.

world $\rightarrow$ ChronaGate™ $\rightarrow$ SI $\rightarrow$ ChronaGate™ $\rightarrow$ world ingress face · egress face
SI $\equiv \Lambda$ / Π · world $\cap$ SI $= \emptyset$ except through the gate

§01 · OBJECT

What the thing is

WP-11 The Synthetic Intelligence Framework Rev 1.0
SI as one object — substrate, canonical language, PCR™, TARTARUS™ — not a model with a safety layer draped over it. Five domains: doctrine, algebra, circuit, calculus, cradle.

§02 · FOUNDATIONS

What a gate is

GENESIS R3 The Genesis of Synthetic Intelligence
Lattice, PCR™ control law, Axiom A1 (six disjointness obligations), R4 (every effect mediated). Isolation is an audit fact, not a theorem about software that already shares an address space.

WP-10 Deterministic Execution Boundaries Rev 4.4 PAGE PENDING
Axiomatic base: chain, global meet, threshold at TOP, Criterion H1, seven hardware refinement obligations. Cited by WP-11, -12, -13; hosting forthcoming.

§03 · LOAD-BEARING

The architecture, in the order it becomes checkable

WP-12 Level 4 State-Space Deterministic Governance Rev 1.1
The filed circuit as calculus. Chain BOT < IDLE < COND < TOP. The evaluator checks an inequality and never solves one. Traced claim by claim to provisional application 64/157,181.

WP-16 The Unified Control Theory of Synthetic Intelligence Rev 8.0
The whole ladder, switch to Level 7. Four rules: deny dominates; authority never restores itself; the authorized object is the consequential object; liveness may deny and may not authorize.

WP-13 Level 5 Self-Constituting Governance Rev 1.0
The interior may rewrite its rule. Pinning, identity on object and evidence paths, composition by meet. Theorem 5: no gate certifies its own isolation.

§04 · APPLICATIONS

What the architecture does when pressed

WP-14 Reichwein Mechanics of Recursive SI Canonical Ed., Rev 1.0
Level 6. A falsifier is an operator, not a halt. The successor is born at IDLE with no inherited authority.

WP-17C Quarantine Is Not a Grant Canonical
Containment that starts after the proposal is live work is an incident report, not a grant. Ten-part Level 4 evidence test. Certifies no implementation, AI2's included.

WP-18 The Path Dossier Rev 1.1
How a Level 4 claim is attested: one path, ten exhibits, two-field disposition, machine-readable schema.

WP-15 The Three-Dimensional Calculus of SI Rev 2.0
The thinking side: thought as a field, PCR™ as its clock, Codex-1 as its language. Adds no authority to anything above.

§05 · PATHS BY READER

If you only have one sitting

BOARD / INSURER Note $\rightarrow$ WP-17C $\rightarrow$ WP-16 Was this action constructable, given gate state at t = 0? Ethics does not underwrite. A bound can.	CONTROL / SAFETY Note $\rightarrow$ Genesis R3 $\rightarrow$ WP-12 $\rightarrow$ WP-16 Layout, calculus, then the ladder. A1 is audited in silicon.
FORMAL METHODS WP-12 $\rightarrow$ WP-13 $\rightarrow$ WP-14 $\rightarrow$ Genesis Then return to the note: the algebra is not the enclosure.	VENDOR CLAIM WP-17C $\rightarrow$ WP-18 Apply the test path by path. Do not start with any product page, including AI2's.

OWED · NOT IN THE CORPUS YET

The grant-policy note. Grant policy is a separate seat, held outside the gate. Π evaluates a grant; it does not originate one. The clerk is not the legislature: the architecture is a substrate for policy, not a substitute for it. Until the note exists at the same rigor, the cut is asserted, not specified. Also owed: WP-10 hosted; ingress-face obligations mapped onto filed hardware claims; A1 disjointness verified in layout.

The mind may propose. The world may grant. Neither may occupy the other's seat.
Read the spine first so the seats stay distinct.
